EXPERIENCE

2025/03 – PRESENT

SITE RELIABILITY ENGINEER, KAIZEN GAMING (BETANO/STOIXIMAN)

Worked in a hybrid manner for the Singleton team of the SRE tribe.

Technologies used: Containerization (Docker), Orchestration (Kubernetes/OpenShift), Templating (Helm/Jinja), Chaos Engineering (SteadyBit), CI (Gitlab), CD (ArgoCD), Load Balancing (NGINX).

2023/05 – 2025/03

SITE RELIABILITY ENGINEER, KAIZEN GAMING (BETANO/STOIXIMAN)

Worked in a hybrid manner for the Adelaide team of the SRE tribe.

Technologies used: Containerization (Docker), Orchestration (Kubernetes/OpenShift), Templating (Helm/Jinja), IaC (Ansible/Terraform), Monitoring (Prometheus/Grafana/Graylog), CI/CD (Gitlab), Git, Automation (Python/Shell), Load Balancing (Nginx/Cloudflare).

2021/10 – 2023/04

SITE RELIABILITY ENGINEER, AGILE ACTORS

Worked remotely as a DevOps/Site Reliability Engineer for GfK's CP (Client Platform) SRE team.

Technologies used: Containerization (Docker), Orchestration (Kubernetes), Tempalting (Helm/Jinja), Cloud Services (GCP), IaC (Terraform), Monitoring (Prometheus & Grafana stack), CI/CD (Gitlab), Git, Audotmation (Shell scripting), GitOps/CD (FluxCD).

2020/06 – 2021/10

CLOUD ENGINEER, INTRACOM-TELECOM S.A.

Virtual Network Functions (VNF) Integration on Cloud environments like RedHat OpenStack Platform (RHOSP) and Container Network Functions (CNF) Integration on AWS for Ericsson Telecom Nodes. Working remotely for a multicultural Ericsson team as external partner.

Technologies used: Kubernetes (K8s), AWS, OpenStack, Linux, Virtualization.

2018/11 – 2020/06

SOFTWARE ENGINEER, INTRACOM-TELECOM S.A.

Agile team member, worked as a Software Developer for the IP Load Balancer product, native and virtualized as well. Active member in various projects, like ANSSI (SUSE Linux Server Security & Hardening), IPv6 for virtualization, and Microarchitectural Data Sampling (MDS) Mitigations for SUSE Linux. Furthermore, developed two CI/CD automation platforms using Jenkins, Python and Shell scripting for the IPLB products. IP Load Balancer is a part of Ericsson MSC (Mobile Switching Center).

Technologies used: C/C++, Shell scripting, Linux, Python, CI/CD (Jenkins).

EDUCATION

SEPTEMBER 2017

MASTER OF SCIENCE, ELECTRONICS & INFORMATION PROCESSING, UNIVERSITY OF PATRAS

Master Thesis Title: "Design & Implementation of a digital processing system for QR bar-codes (ISO/IEC 18004)"

JUNE 2015

BACHELOR OF SCIENCE, PHYSICS, UNIVERSITY OF PATRAS

Major in Electronics, Computers & Signal Processing

Thesis Title: "Eye-Trackers, Saliency maps and their applications in Signature's Recognition"

SKILLS

- Linux
- C/C++
- Python
- Virtualization
- Git
- Shell Scripting
- Templating (Helm, Jinja)
- Monitoring (Prometheus/Grafana, Graylog)
- IaC (Terraform/Ansible)
- CI/CD (Gitlab/FluxCD/ArgoCD)
- Openshift (Kubernetes)

ACTIVITIES

- Certifications & Languages
 1. [Certified Kubernetes Administrator](#) (CKA, Linux Foundation/CNCF) (issued November 2023)
 2. [Certified Argo Project Associate](#) (CAPA, Linux Foundation/CNCF) (issued November 2025)
 3. [Certified Kubernetes Application Developer](#) (CKAD, Linux Foundation/CNCF) (acquired December 2023, currently expired)
 4. All Certifications visible on Credly personal page [\[here\]](#)
 5. [Vmware Certified Associate - Digital Business Transformation 2020](#) (VMware)
 6. English: ECPE (Certificate of Proficiency in English), level C2
 7. German: Zertifikat Deutsche Zeugnis, level B1
